Do you agree or disagree	
that the use of satellite	
navigation (sat nav) by Taxi	
and Private Hire Car Drivers	
has replaced the need for the	
Knowledge Test for potenial	
applicants?	Please provide reasons for your answer
approunts:	Satnav systems don't always recognise newer housing estates or buildings, and may
Strongly disagree	drop out due to lack of WiFi/signal
Disagree	Think local knowledge still beneficial
Disagree	Access to a signal would need to be guaranteed
	its also beneficial to use sat nav even for those who know the area very well on road
Strongly disagree	closures/ accident/road work/traffic occasions.
Strongly disagree	It helps but knowledge outwith this is important.
Strongly agree	Sat nav/ mobile phones can be updated every year
	As someone who has lived all my life in Alexandria and driven for over 30 years there is
	no substitute for local knowledge and there are many local areas where you need to
Strongly disagree	ask questions of customers to find out where they are travelling to.
Strongly disagree	You so not use sat nav for short local.journeys , you should have local knowlesge
Strongly agree	It's much easier to navigate now
Disagree	Satnav is not infallible. Because you're driver should know instantly what route to go when you give them an
Strongly disagree	address what if he inputs the wrong address
Strongly disagree Disagree	For the same reasons as above
Disagree	You still need to know the area
Strongly agree	It's a distraction and they don't always work
Strongly agree	Street knowledge
Strongly agree	Provide an alternative to our street knowledge
3,7 3	Sat nav is not always 100% and can at times not find certain areas also the constant
	use of sat navigation to find your way around can and will cause delays as it doesn't
Strongly disagree	always take you the fastest route
	Any congestion/accidents driver with local knowledge old be able to operate a lot more
Strongly disagree	efficient providing a more confident journey
	At least a reasonable knowledge should be known, Sat Navs do not always take
Strongly agree	shortest routes.
Otrono orbino como o	Too many Taxi Drivers don't have enough knowledge of their own local area and I feel
Strongly agree	this is wrong
Strongly disagree	In xasea of disruption a sriver with knowledge will know the shortest and safest route
Strongly disagree	Technology isn't everything and doesn't always recognise post codes
Changly disagree	Sat navs don't gibe the shortest route most of the time, if the knowledge test is passed
Strongly disagree	then the applicant will be able to work out a shorter route
- and any and any and any	Sat Nav is not always accurate especially in rural areas eg Gartocharn, Drymen,
Strongly disagree	Luss.Also new build housing developments
Strongly disagree	Local knowledge provides confidence and safety
	It's not a good look to be using sat nav to look for a local place it may cost the customer
Disagree	in time & money
<u> </u>	The sat navigation systems are not always correct and local knowledge will always be
Disagree	correct as new housing estates do not even register on satnav for months /years.
Strongly agree	100% all drivers use sat nav's - shows road closures , shortest route etc
04	The map takes your right to the job this helps when working late at night as you can't
Strongly agree	see street numbers the sat nav is massive help When needed it's available
Agree Strongly agree	Sat bavs take you to the correct destination
Strongly agree	I personally have used the sat-nav on multiple occasions which has resulted in the
Strongly agree	customers fare being slightly less than they usually pay
	Sometimes you loose signal of your satnav as you loose gps signal. They haven't
	replaced drivers "knowledge" as we know the shortest distance as a satnav will slow
	aye take you the quickest route which is longer sometimes which makes fare more
Strongly disagree	expensive
Strongly agree	Some of the map apps have new build addresses before postcode works
Strongly agree	Sat nav put address in and it takes you there
Strongly disagree	Sat nav route not always cheapest
Agree	All PDA have sat navs and easy to use
Strongly disagree	Sat nav's are a useful ,but drivers shouldn't be dependant on them to do there job

Strongly agree Strongly disagree	We all have access to Google maps and other similar type apps. Sat navs can get confused with diversion
on ongry aloagroo	out have can get commerce than arreners.
	There could be road closures which the sat nav would not recognise until road closures
Strongly disagree	have be meet
Strongly disagree	Should have local knowledge of the area you are working
Strongly disagree	Local knowledge critical rural area hires.
Agree	The Knowledge test is fairly redundant nowadays due to mapping apps.
	There are customers that change journeys on the route to destination, does this mean
	customers will be happy for drivers to pull over and update there say nav costing more
Strongly disagree	money. As they do not know the general area!!
Strongly disagree	Satnavs are not updated often enough. New housing estates would be unknown.
Strongly disagree	Sat navs are not accurate on all routes depending on time of travel
Disagree	local knowledge is essenal only time sat nav should be used if leaving your area
	As I've already mentioned local knowledge is far superior to entering a random
Strongly disagree	postcode
	Mistake can be made very easy unless you have the appropriate knowledge of the area
Strongly disagree	and sat navigation dose take the shortest route
	Standards and customer service will slip if we allow any Tom, Dick or Harry to drive in
Strongly disagree	Clydebank. We have a good standard within the trade and want to maintain this image
	Sat navs or similar are only as good as the people using them, if there's no area
	knowledge then it's all too easy to make mistakes, normally these are costly and hits
Strongly disagree	passenger in the pocket as the drives take no responsibility for their errors
	There is to much margin for human error with the use of satellite navigation systems , a
Strongly disagree	good geographic knowledge is paramount
	The generation has changed and so much more technology is taking over any
Strongly agree	knowledge needed
	If a road is suddenly closed local knowledge allows the driver to take an alternate route.
Strongly disagree	Sat navs don't update in real time, particularly on non trunk routes.
Strongly agree	The latest platforms are extremely accurate whilst accounting for shortest routes.
Disagree	Think standard of knowledge is key to a driver, can't always depend on satnav
Agree	useful tool as can provide the most direct route
Strongly disagree	They don't cover diversions or closed roads
	Sat navs can't replace a knowledgeable experienced taxi driver sat navs can
Strongly disagree	disadvantage the public
	Knowledge is key in any work place, the use of digital devices for me doesn't help in
Ctura washing aliana awara	learning and having a skill set for the job if digital devices crash then your knowledge
Strongly disagree	should automatically come to the fore
Agree	Sat nav doesn't always provide the route the customer would like to go. I believe that the taxi driver should have sound knowledge of the area to provide the
Strongly disagree	best customer service without the need for sat nav
Strongly disagree	Local knowledge is paramount this sat nav takes you long ways all the time I have
Strongly disagree	examples and customer's are complaining
Strongly disagree	Using sat nav is danderous when moving and are not always accirate as in selecting
Strongly disagree	the shortest route as required when operating under a WDC set meter
Strongly disagree	Think every driver should know there local area. Sat nav are not always reliable.
Strongly disagree	Because they don't always give shortest routes costing the customer more money
Strongly disagree	Sat nav not always cheapest
	Electronic devices and apps should only be used as a back up as they do not always
Strongly disagree	plot the shortest route.
	Hate being in a cab where the driver is constantly messing with his phone or stereo,
Strongly disagree	happens all too often as it is
Strongly disagree	Sat nav doesn't always take shortest route
Strongly agree	Just is
	A sat nav is only as good as the person inputting information and if its updated. Local
	landmarks and driver knowledge should be important to give public confidence and
Strongly disagree	provide a safe journey experience
Strongly disagree	Satnavs are not always correct.
	I agree that the knowledge test should stay in place as sat/nav can be a hazard if no
	Internet connection is not a available this would be for disabled people & person with
Agree	hard of hearing it must & the questions should be harder Clydebank is expanding
Strongly disagree	it will bring in people that will ruin a dying trade
	• , ,
and agree	Local knowledge of ones lic area should be a prerequisite for a lic holder. Using a sat
Strongly disagree	Local knowledge of ones lic area should be a prerequisite for a lic holder. Using a sat Nev whist driving is ,like mobile phones, is an offence under Road Traffic Act

Strongly disagree	Say nav does not always work ie diversion to the route or when no signal
	Sav nav don't allow for professional local knowledge , ie sends you on the quickest
Strongly disagree	route not the shortest ^o
Strongly disagree	Dangerous as drivers could be typing into satnav while they are driving
	I think all drivers know their own areas and only use sat nav sometimes when travelling
Disagree	outside west dunbartonshire
	I disagree with this based on that sat navs don't always take the shortest routs and if
	there's any hold ups or local road closures then local knowledge will always help in
Ctus us allow discourses	
Strongly disagree	these situations, drivers need to concentrate on job in hand an not watch a satnav
	It's good to know that you have some knowledge of the area
Strongly disagree	The driver needs to have a broad spectrum of the area they are driving in!
Strongly disagree	Knowledge of the area badge holders work is essential knowledge
	When the hire gets in they do expect the driver too no where they are going except
Disagree	when it's out the area
	Depending on how the sat nav is set up it does not always take the shortest route i.e
	strathclyde road to tullichewan it will route right round the bypass whereas through the
Strongly disagree	renton is much cheaper .knowledge of the area always beats a satnav handsdown.
Disagree	Handy to have but local knowledge is better
Disagree	Previous answer. Too reliant and do not have local knowledge. E.g traffic congestion
Strongly agree	
Strongly agree	use alternative route
Strongly disagree	You should know the Area you operate in surely!
	Technology has taken over route planning and new drivers will have local knowledge
Strongly agree	within a week of starting taxiing.
Strongly agree	Satnav does not always take you the shortest route!
Agree	Everything to an extent is now done on apps
	The sat nav increases the risk of accidents, drivers are tempted to use them while the
Disagree	vehicle is in motion
Disagree	Satalite signal not 100% reliable
l l l l l l l l l l l l l l l l l l l	I live in old kilpatrick and dropping our son and daughter in law off at dumbarton road
	just before the free lands roundabout the the taxi done a u turn to go up mount blow
	just before the nee lands roundabout the the taxi done a ditum to go up mount blow
Diagras	road when Omine straight on we're home that's following his set nov
Disagree	road when 2mins straight on we're home that's following his sat nav

Neutral Strongly disagree Neutral Strongly agree Strongly disagree Strongly disagree Disagree Strongly disagree Agree Agree	If it's Local knowledge then the driver should know quickest route For some homes particular in bonhill Alexandria, Sat nav can only take you close to the homes but not at their doors and also should customers be in the taxi they are happy to help any drivers out who are unfamiliar with their exact address. They don't watch the road and spend too much time watching the sat nav Sat nav is great for monitoring traffic however there are issues with post codes only locals will know of. Knowledge of the local area especially for tourism is something a sat nav can never replace U would have to have a good no about the area u at working Sat nav should be a back up only, severs relying on this would be giving there full attention too the road Local knowledge is better As a driver the use of these devices while driving are illegal so change of destination or diversions could create temptation to use said devices while driving It's illegal to operate electronic devices while driving We still need to know the shortest routes and satnavs only show the straitest way from a to b This reduces credibility Takes you shortest route ie held up in traffic satnav does not always take you the shortest route like a taxi should! taxi drivers should not have to use a satnav to to work in the area they operate in! Customers expect Taxi drivers to have knowledge of their area without having to check on maps. The potential for confusion over directions to similar sounding roads is significant if satnavs are the sole source of driver information. Sat nav almost instantly re-route should there be a road closure or accident on your journey and alert you of any congestion.

	Local drivers know the areas and mostly use sat nav for more accurate destination IE
	numbers on front doors. The majority of local taxi drivers don't need to use sat navs as
Disagree	they have grew up in the area and know where they're going.
Strongly disagree	Answered in previous question
Strongly agree	There is always new roads being built, and Sat nav updates regularly
Strongly agree	Satnavs quite often lose their signal, they often take you longer routes
	The apps for sat nav aren't completely accurate so a general knowledge on the area is
Disagree	advantageous
	I use sat nav myself for areas I don't know out with Clydebank but they also don't give
Neutral	you the most accurate route to benefit the customers charge.
Strongly disagree	not everyone knows the post code or business address/exact house they are going to
	Sat nav doesn't always show the shortest route, which will could cost the customer a
Strongly disagree	lot more money
Strongly agree	Sat nav is educational to drivers until they no longer need it
Neutral	A sat nav is a useful tool but good local knowledge is still needed
	Sat nav is good to let you know what road closures there are and also good to use if
Neutral	you are going outwith your local taxi area
Strongly disagree	Topographical knowledge is important
Strongly disagree	Sat navs are not always reliable
Neutral	Yes they are needed if going outwith your area
Neutral	What happens when navigation goes down u need to have some idea of ur route
	Sat nav shows in most cases the fastest route and not the cheapest route that we have
	to take unless a customer specifically requests otherwise. Sat nav also takes your
Strongly disagree	attention away from the road and the customer
Neutral	Don't have a opinion
Disagree	I woul'd say it has lessened the need, but not entirely 'replaced'.
	I have been driving a taxi for the last 4 months and have used a sat nav for 99% of my
	hires with no issues. This also helps with difficult areas such as Bonhill where all drivers
Strongly agree	are handed maps to try and work out house numbers etc.
Strongly disagree	Sat navs aren't 100% accurate
Strongly disagree	Sat nav not always accurate at peak times to avoid traffic congestion or road works
	Wrong destinations happen some female travel solely can be intimidating when driver
Strongly disagree	doesn't know atea
Disagree	They're local and know the area and the laws.
Agree	i agree sat nav helps when outside dunbartonshire hires i.e glasgow and further
7.19.00	Always feels safer if you know your driver is in control and not solely dependent on
Disagree	apps and navigation devices
Disagree	Sat navs make it easier for drivers renewal ect
J.ougree	Sat nav's are incredibly useful, unfortunately the test is outdated and does not cover
	many of the new developments that have been built in West Dunbartonshire, have a
Agree	sat nav covers these gaps.
rigice	We use the Sat nav constantly as it is impossible to remember every route and every
Agree	street name
Strongly disagree	Common knowledge is very important than relying on technology
Strongly agree	It's so much better and easier
Strongly disagree	Sat nav not always accurate for the destination
Chongry disagree	Being involved in the Taxi trade more or less since 1974 Satellite navigation is now built
Strongly agree	in their PDA's so their is no need to read street maps anymore
Chongly agree	The treat is the freed to read street maps arrymore
	Some drivers rely on sat nav outwith their area. Why can't they be used within their
	area until they learn on the job. Since 2017 DVSA have incorporated it into their test.
Strongly agree	Encourage more drivers to apply, more taxis on the road, provide more employment
Strongly agree	Encourage more univers to apply, more taxis on the road, provide more employment
