DC10/249/FUL

Development within Existing Residential Areas

6.34 As well as ensuring that new residential development reaches the highest standard, it is also vital that the character and amenity of existing residential areas is protected and enhanced by any new development which is proposed. This is particularly important when, as a matter of policy, development is being actively promoted within the existing built up area.

Policy H5 Development within Existing Residential Areas

The character and amenity of existing residential areas, identified on the Proposals Map, will be safeguarded and where possible enhanced. Development within existing residential areas will be considered against the following criteria:

- the need to reflect the character of the surrounding area in terms of scale, density, design and materials;
- the requirement to avoid over development which would have an adverse effect on local amenity, access and parking or would be out of scale with surrounding buildings;
- the need to retain trees, hedgerows, open space and other natural features;
- extensions to dwellings must complement the character of the existing building, particularly in terms of scale and materials, not dominate in terms of size or height, and not have a significantly adverse affect on neighbouring properties;
- the subdivision of the curtilage of a dwelling for a new house should ensure that the proposed plot can accommodate a house and garden; the new house and garden to be of a scale and character appropriate to the neighbourhood; sufficient garden ground should be retained for the existing house; the privacy of existing properties should not be adversely affected and separate vehicular accesses should be provided;
- with regard to non-residential uses, whether they can be considered ancillary or complementary to the residential area, and would not result in a significant loss of amenity to the surrounding properties. A significant loss of amenity might be expected to occur as a result of increased traffic, noise, vibration, smell, artificial light, litter, hours of operation and general disturbance; and
- the proposal conforms with other Local Plan policies

Reasoned Justification

6.35 This policy seeks to ensure that the character of existing residential areas is protected and that all development proposals within these areas will maintain or enhance their amenity. It is considered that using sympathetic design, avoiding over-development and retaining existing landscape features is the best way of achieving this. It is particularly important that the development of infill and gap sites should not be at the expense of open space which makes an important contribution to the quality of local environments.

6.36 The introduction of small-scale non-residential uses to existing residential areas may be acceptable, but their impact on the residential environment will be the overriding consideration. Policy H 5 indicates the factors which might lead to a loss of amenity in an existing area. However, there may be benefits in encouraging some other suitable uses into existing residential areas, for example nursing homes, children's nurseries and offices, which could provide small-scale local services and employment opportunities.
