1. INTRODUCTION

- 1.1 The Council has a statutory obligation, under Section 34 of the Roads (Scotland) Act 1984, to take such steps as it considers reasonable to prevent snow and ice endangering the safe passage of pedestrians and vehicles over public roads which by definition includes carriageways, footways, footpaths, pedestrian precincts, etc.
- 1.2 The Council has **no** responsibility to supply a similar service in respect of the A82 Trunk Road, for the Scottish Executive. This work has been contracted out to Messrs Amey, and Transerve, the private sector operating companies appointed by the Scottish Executive to maintain the trunk routes.
- 1.3 It is the aim of the Department of Housing, Regeneration and Environmental Services in respect of its maintenance service to:-
- (i) provide a standard of service on public roads which will permit safe movement of vehicular and pedestrian traffic appropriate to the prevailing weather conditions;
 - (ii) establish a pattern of working which will keep delays, diversions or road closures to a minimum during adverse weather conditions;
 - (iii) conduct operations having regard to the requirements of the Health & Safety at Work Act 1974.

2. POLICY ON TREATMENT PRIORITIES

The Council has defined for roads the priorities for carriageway and footway/footpath treatment as follows:-

2.1 Carriageway Priorities

- (i) Principal 'A' class roads
- (ii) Access routes to hospitals, ambulance depots, police stations and fire stations; local danger spots; roads with steep gradients; bus routes.
- (iii) 'B' class roads not included in Priority (ii) above, and routes to sheltered housing complexes.
- (iv) Local concentrations of employment i.e. industrial estates.
- (v) 'C' class roads.
- (vi) Unclassified public roads.
- (vii) Prospectively maintainable roads.
- (vii) Private roads

2.2 **Footway/Footpath Priorities - gritting**

Manual labour with supporting mechanical equipment should be used to clear a safe passageway along footways and footpaths on the following priority basis.

1. Major urban shopping areas and precincts. (i.e. those with > 20 retail units) and footways in the vicinity of public sheltered housing developments (i.e. the internal paths serving multiple properties which link to main footway/footpath network) .
2. Minor shopping areas and other areas of high pedestrian concentration, e.g. in the vicinity of hospitals and factories.
3. Steep hills on main access routes in housing developments.

The treatment of footways will be undertaken when the assessed weather situation indicates a need, using the footway treatment standby resource. Where deemed appropriate by the standby duty officer, night patrols will be used to assess the local condition of priority carriageway routes.

It is not always possible to treat the full width of footway/footpath, and in such cases a gritted passage along the route will be provided. In order to cover a greater area, hand casting will be minimised in favour of machine-based gritting.

2.3 **Footway/Footpath Priorities – snow clearing**

At times of very heavy snow fall, the priority for clearance of snow in the first 12 hours of any call out will be as follows :

- (i) Urban sections of principal 'A' class roads and bus routes. The initial aim will be to clear one side of each road.
- (ii) Access routes from (i) local concentrations of employment, hospitals, ambulance depots, police stations, fire stations, sheltered housing complexes and schools.
- (iii) Unclassified roads within urban areas.
- (iv) All remaining roads with footpaths and footways

This snow clearing will be undertaken when the visible weather situation indicates a need, using the footway treatment standby resource with additional resources deployed as available.

It is not possible to give a timescale for completing elements of this priority list as progress will be determined by the severity of weather conditions.

After the initial 12 hour period of snow clearance, footway priorities as in 2.2 above will return.

3. **ORGANISATION**

The Director of Housing, Regeneration and Environmental Services is responsible for specifying the level of winter maintenance service required and is responsible for implementing this service through the Head of Land Services, for which further details are provided as follows:

Appendix 'A'	Map indicating the operation boundaries.
Appendix 'B'	Contact telephone numbers applicable either during or outwith normal working hours.

4. SECTION RESOURCES

4.1 General

- (a) It is the responsibility of the Manager of Roads to define the level of service to be provided and to issue appropriate works orders to Roads Operations to provide the necessary labour and plant for winter maintenance operations.
- (b) The Manager of Roads shall thereafter be responsible for advising the Head of Land Services of any matters which may affect his ability to deal with adverse weather conditions e.g. labour disputes, extensive plant breakdowns etc.

4.2 Labour

- (a) Special arrangements concerning the availability of labour resources for winter maintenance come into effect from the start of the first full week of November and continue until the end of Easter Monday, although the period may be extended beyond this date should conditions warrant such actions. These arrangements include home stand-by which is activated by the designated Roads Operations supervisory staff based on weather forecasts from PA Weather, or as a result of hazardous road conditions being reported.
- (b) In determining the labour resources required for winter maintenance (Appendix C), cognisance is taken of the Department's objective to treat all routes defined in priority category (i) (paragraph 2.1) before the commencement of the morning peak. Where appropriate routes in category (ii) (paragraph 2.1) can be linked with category (i) routes it will be endeavoured to also complete these routes prior to the morning peak.

4.3 Vehicles Plant and Equipment

- (a) Prior to mid-October each year, Roads Operations will check that all equipment for salting roads and snow clearing is in working order and, where appropriate, that ancillary items can be fitted to vehicles without difficulty, e.g. ploughs will be marked with the vehicle number to which they are to be fitted and set up on blocks to facilitate assembly. The above procedure should also be applied to vehicles and plant available under contract for winter maintenance.
- (b) As radios allow contact to be maintained between office and operational staff, as many vehicles as possible employed on winter maintenance are to be equipped with this facility. Otherwise mobile phones are to be issued. It is hoped to have GPS communication links available for 2007/8.
- (c) A summary of Department vehicles, plant and equipment available for winter maintenance work is detailed in Appendix 'C'.

4.4 **Salt**

- (a) By 1st October, Roads Operations should reassess stock levels together with committed deliveries against requirements and arrange for alternative sources of supply to make good any anticipated deficiencies.
- (b) During the season, Roads Operations should arrange for a weekly check to be made on the amount of salt used and for stocks to be augmented as necessary.
- (c) At Elm Road Depot, Dumbarton and Stanford Street Depot, Clydebank small quantities of salt are available (<10kg) for issue free of charge to the public, subject to their supplying a suitable container. Notice of this facility is intimated by the Director of Housing, Regeneration and Environmental Services in an information leaflet.
- (d) The quantity of salt held in stock at 30 September is given in Appendix 'C'.

5. **OTHER RESOURCES**

- 5.1 During adverse weather conditions, Roads Operations (after consultation with the Manager of Roads) should, if necessary augment their resources by the use of other Departmental Sections, farmers, plant hirers and contractors at rates agreed prior to engagement. The Manager of Roads should be advised, as soon as practicable, of external resources engaged as a result of decisions made outwith normal working hours.
- 5.2 Arrangements will be made with other Council/Departmental Sections to provide assistance where required. An outline list of contact numbers and anticipated manpower availability is provided in Appendix 'D'. A schedule of gritting locations will be available prior to the onset of winter for issue to other Departments as necessary

6. **METEOROLOGICAL REPORTS**

- 6.1 Roads Operations should ensure that appropriate members of staff receive the daily weather forecasts provided by PA Weather at 1300hrs. and 1900hrs. (and updates outwith those times), throughout the working week, at weekends and on public holidays from 1st October to 1st May. Roads Operations should ensure that PA Weather is provided with the telephone numbers of the members of the staff responsible, on a rota basis, for initiating action outwith normal working hours. Thereafter, it is the responsibility of those persons to take action including the calling out of stand-by squads to undertake salting/snow clearing.
- 6.2 Staff have the facility at any time to contact PA Weather for advice or clarification of forecasts.

7. **ICELERT**

- 7.1 In addition to the standard weather forecast information referred to previously, the authority may have available further information from sensors which have been installed at a location on the A82 near Renton, the A811 at Gartocharn and at the A810 near Faifley (Hardgate). The station on the A810 should be considered for replacement within the next few years. In addition, the weather forecasting contractor has suggested that improved forecasting would be possible if an additional station was placed along the A814 corridor between Dumbarton and Cardross.
- 7.2 The sensor provides current detail of road and air temperatures and indicates the presence of moisture and residual salt thereby identifying locations where icing has occurred or where there exists a risk that it will occur. This information is available via a computer link to Roads Operations staff and the homes of appropriate members of staff.

- 7.3 By utilising the data supplied by the Icelert system, PA Weather is able to supplement the forecast by producing a more detailed forecast of likely temperatures at the A82 sensor site. The other sites provide current and historical information. Again, this information is available via a computer link.
- 7.4 When a decision to treat the road network with salt is marginal, actual road conditions at the location of the sensor sites can be monitored using the Icelert system and action taken as necessary. Arrangements have been made with PA Weather to monitor the sensors outwith normal working hours and to contact staff where appropriate.
- 7.5 When the prevailing weather conditions and ice sensor information indicate that it would be prudent to use a manned night patrol to initiate a call out, this will be authorised by the standby duty officer. In winter 2005/6 such night patrols were used 14 times.
- 7.6 There may be times when weather changes unexpectedly and forecasts are inaccurate. One result of this can be unplanned 'emergency' call outs. In winter 2005/6 there were 6 such call outs.

8. ROAD CONDITION REPORTS

During periods of adverse weather Roads Operations should pass reports on road conditions to the Manager of Roads, by 09.45 hrs in order that a collated report can be made available on request to the Head of Land Services before 10.00 hours. These reports should be updated as necessary depending on changing circumstances.

9. STATEMENTS TO THE MEDIA

The Public Relations Section of the Corporate Services Department will deal with statements to the Press, Radio and Television regarding road conditions throughout the authority.

10. ROAD CLOSURES

- 10.1 Where a road is closed, Roads Operations is responsible for ensuring that Police, Ambulance and Fire Services are advised, that appropriate measures have been taken to redirect traffic and that necessary signs are put in place. When the road affected is a through-route, the adjoining authorities should be kept informed.
- 10.2 Prior to signing diversionary routes, the capacity of the roads and the headroom and weight restrictions of structures should be checked with the Section Head (Traffic and Transportation) to ensure that they are adequate.

11. LIAISON WITH THE POLICE

- 11.1 In recognition of the role of the Police during difficult weather conditions, Roads Operations should take steps to advise them of forecasts relating to medium or heavy snowfall. Where practicable, the Police should also be informed in advance of proposed operations. Roads Operations should request appropriate assistance from the Police when moving equipment, arranging road closures and dealing with abandoned vehicles.
- 11.2 Roads Operations should issue out of hours rotas (including amendments) to local Police Offices and to Divisional Commanders' Offices
- 11.3 On request to their Group Traffic Superintendent, the Police have agreed to assist the movement of ploughs and gritting vehicles on major trunk roads and principal traffic routes.
- 11.4 Reports from the Police regarding dangerous road conditions should be acted upon by the Manager of Roads or designated staff on stand-by as soon as practicable, having regard to priorities in this document and the conditions pertaining throughout the authority.

12. ARRANGEMENTS WITH ADJACENT COUNCILS

- 12.1 On roads near the authority boundary, reciprocal arrangements have been agreed with adjoining Councils in respect of assistance with winter maintenance work, when conditions warrant this work.

13. VEHICLE ROUTES

- 13.1 From local knowledge and the resources available, the Manager of Roads and experienced Roads Operations staff, should draw up routes on the basis of the priorities listed in Paragraph 2.1 and 2.2. However, in order to minimise unproductive mileage some roads in a lower category may be treated out of sequence. This may also occur when conditions vary throughout the area. Some degree of flexibility in relation to particular local conditions will improve value for money.
- 13.2 A complete set of route cards should be kept in the Roads Operations offices, with appropriate sub-sets being held in each depot.
- 13.3 A list of route cards is given in Appendix 'E'.
- 13.4 A list of supplementary secondary cards is given in Appendix 'F'.
- 13.5 A series of plans of key pedestrian routes has been prepared and a list of these priority locations is given in Appendix 'G'

14. PRE SALTING

- 14.1 On receipt, within normal working hours, of a forecast from PA Weather warning of frost, freezing or snow conditions, Roads Operations shall give consideration to precautionary salting of priority (i) roads (as defined in paragraph 2.1) or any length of such priority (i) roads, as they consider necessary or routes as described in paragraph 13.1
- 14.2 Where such a warning is received outwith normal working hours the Roads Operations, have delegated authority to activate call out procedures as indicated in paragraph 6.

15. SNOW CLEARANCE

- 15.1 On receipt of a weather warning predicting medium (25-100mm deep) or heavy (over 100mm deep) snowfalls, the Duty Officer (Roads Operations) should recall to depots such vehicles capable of being equipped with snowploughs as he considers appropriate.
- 15.2 Where slush is formed, this should be removed as soon as practicable to avoid the risk of rutting should there be a further significant fall in road temperatures which might result in freezing conditions. Footways will be prioritised as stated in paragraph 2.3.

16. GRIT BINS

- 16.1 Where he considers appropriate, the Manager of Roads will provide self help grit bins in urban areas. Where grit bins are not subject to vandalism, they may be left in position outwith the winter period provided they do not significantly detract from the amenity of the area.
- 16.2 In rural areas, Roads Operations will arrange, prior to the onset of winter, for the provision of heaps of salt at dangerous bends and steep gradients. Care should be taken, in siting heaps, to ensure that adjacent vegetation is not damaged.
- 16.3 The general grit bin location lists are given in Appendix 'H' but this can vary during each winter based on customer requests.
